MATRICULATION EXAMINATION
DEPARTMENT OF MYANMAR EXAMINATION

ENGLISH

WRITE YOUR ANSWERS IN THE ANSWER BOOKLET.
ANSWER ALL QUESTIONS.

I. Read the passage.
Among others, Bagan with its thousands of old pagodas is recognized by the world's travellers as one of the world's wonders. This 1,200-year-old city, with over 2,000 ancient pagodas is proof of the rich cultural heritage of Myanmar and is one of the archaeological treasure houses in Asia.

Just 50 kilometres southeast of Bagan lies Mount Popa, an extinct volcano. It is a unique place for those who would like to enjoy half a day or a day hiking and trekking in the mountain.

If one has a taste for mountains and hills, one can take a trip to the Shan hills where the weather is cooler, and the smiles of the various ethnic groups in their colourful traditional costumes create an atmosphere of warmth and friendliness. Besides, it is here that one will see the famous leg-rowers of Inlay Lake.

Other major tourist attractions in Myanmar are long, white, sandy and unspoilt beaches such as Ngapali, Maungmakan, Chaungtha, Kantharay, and Ngwesaung, where one can study marine life, and enjoy peace and tranquility, as well as view nature at its best.

V. Read the passage.

The majority of malaria deaths occur among young children and pregnant women.
Early diagnosis and prompt adequate treatment is essential in curing malaria and preventing
death. A limited number of drugs for treating malaria are available. However, in some regions
the parasites are resistant to certain antimalarial drugs, particularly chloroquine. People
continuously infected gradually develop immunity to the disease.

Preventing malaria includes a variety of measures: wearing protective clothing, using
repellents, and sleeping under bed nets treated with insecticides. Community protection
measures, like using insecticides, are directed against the mosquito to control transmitting the
disease. But, Bacillus thuringiensis israelensis (Bti) - naturally occurring bacterium that is lethal
to mosquitoes and black flies - may be a solution because mosquitoes are becoming more
resistant to chemical insecticides, which have been used for decades to control malaria. The importance of Bti is that it is an environmentally safe biological pesticide found in nature.

**Answer these questions. Give complete answers.** (10 marks)

1. Who suffer more from malaria deaths and what is needed to cure malaria and prevent death?
